

Index to Volume 53

- Absorption, intestinal, the influence of villous counter current exchange, 145
- ADLER, I., A model of space filling in phyllotaxis, 435
- Ageing, a model for, 253
- AMP levels, cellular cyclic, quantitative aspects of the regulation of, I. Structure and kinetics of a model system, 1
- AMP levels, cellular cyclic, quantitative aspects of the regulation of, II. Kinetics of drug action in a model cyclic AMP generating system, 31
- Antibody dilemma, immunoglobulin phenotype as a solution of the, 67
- Application of Markov chains to analysis of a simulation of birds foraging, 285
- Bacteria, synthesis of ribosomes and RNA polymerase in, parameters affecting the rate of, 115
- Bacterial chemotaxis in a fixed attractant gradient, 215
- BARDSLEY, W. G. (see CHILDS, R. E.), 381
- BAUMAN, A. J. and YOKOYAMA, H., Magnolia seed carotenoid pigments: typical evolutionarily-static relicts? 277
- BREEN, D. L., Coenzyme Q: a molecular orbital study, 101
- BREMER, H., Parameters affecting the rate of synthesis of ribosomes and RNA polymerase in bacteria, 115
- BURGESS, A. W. and SCHERAGA, H. A., A hypothesis for the pathway of the thermally induced unfolding of bovine pancreatic ribonuclease, 403
- Carotenoid pigments, magnolia seed: typical evolutionarily-static relicts? 277
- Cell cycle and growth kinetics in roots, a model for, 463
- Cells, normal and abnormal, mitotic autoregulation of: alternative mechanisms for the derangement of growth control, 421
- Chemical systems *in vivo*, functional analysis of, using a logical circuit equivalent. V. Molecular biological interpretation of the self-reproducing automata theory and chemico-physical interpretation of information in biological systems, 223
- Chemotaxis, bacterial, in a fixed attractant gradient, 215
- CHILDS, R. E. and BARDSLEY, W. G., Time-dependent inhibition of enzymes by active-site-directed reagents. A theoretical treatment of the kinetics of affinity labelling, 381
- Code degeneracy, comment on, "Information theory and the central dogma" (letter), 243
- Coenzyme Q: a molecular orbital study, 101
- Comment on code degeneracy, "Information theory and the central dogma" (letter), 243
- Commitment to senescence: a model for the finite and infinite growth of diploid and transformed human fibroblasts in culture, 481
- Computer analysis of division patterns in the *Drosophila* head disc, 445
- Conformation energies and electronic structure of phenethylamine and amphetamine, 475
- CUPPOLETTI, J. and SEGEL, I. H., Kinetic analysis of active membrane transport systems: equations for net velocity and isotope exchange, 125

- DAVIES, J. I. and WILLIAMS, P. A., Quantitative aspects of the regulation of cellular cyclic AMP levels. I. Structure and kinetics of a model system, 1
- DAVIES, J. I. and WILLIAMS, P. A., Quantitative aspects of regulation of cellular cyclic AMP levels. II. Kinetics of drug action in a model cyclic AMP generating system, 31
- DE LA TORRE, C. (see LÓPEZ-SÁEZ, J. F.), 463
- Deoxyribonucleic acid helix-cruciform transition, thermodynamic considerations of (letter), 497
- DÍEZ, J. L. (see LÓPEZ-SÁEZ, J. F.), 463
- Division patterns, computer analysis of, in the *Drosophila* head disc, 445
- DOUGLAS, G. J., Sliding filaments in sperm flagella, 247
- EBRINGER, A., A comment on code degeneracy, "Information theory and the central dogma" (letter), 243
- Electronic structure and conformation energies of phenethylamine and amphetamine, 475
- Enzymes, time dependent inhibition of, by active-site-directed. A theoretical treatment of the kinetics of affinity labelling, 381
- Equilibrium diversity in plant-pollinator systems, 263
- FERNÁNDEZ-GÓMEZ, M. E. (see LÓPEZ-SÁEZ, J. F.), 463
- Flagella, sperm, sliding filaments in, 247
- Forces, long range intermolecular, between macroscopic bodies: macroscopic and microscopic approaches, 83
- GALLAHER, E. E. (see KING, C. E.), 263
- GARCÍA-HERDUGO, G. (see LÓPEZ-SÁEZ, J. F.), 463
- GIMÉNEZ-MARTÍN, G. (see LÓPEZ-SÁEZ, J. F.), 463
- GONZÁLEZ-FERNÁNDEZ, A. (see LÓPEZ-SÁEZ, J. F.), 463
- GOTOH, H., A model of the activation process of Na^+ conductance in the squid axon: an approach with interactive desorption kinetics of divalent cations, 309
- GROSSBERG, S. and LEVINE, D., Some developmental and attentional biases in the contrast enhancement and short term memory of recurrent neural networks, 341
- Growth kinetics and cell cycle in roots, a model for, 463
- HAGESETH, G. T. and JOYNER, R. D., Kinetics and thermodynamics of isothermal seed germination, 51
- HALL, G. G., MILLER, C. J. and SCHNUELLE, G. W., Conformation energies and electronic structure of phenethylamine and amphetamine, 475
- Histamine, stable conformations of, by empirical method, 333
- HOLLIDAY, R. (see KIRKWOOD, T. B. L.), 481
- Hypothesis for the pathway of the thermally-induced unfolding of bovine pancreatic ribonuclease, 403
- Immunoglobulin phenotype as a solution of the antibody dilemma, 67
- Influence of villous counter current exchange on intestinal absorption, 145
- JOYNER, R. D. (see HAGESETH, G. T.), 51

- KANUNGO, M. S., A model for ageing, 253
- Kinetic analysis of active membrane transport systems: equations for net velocity and isotope exchange, 125
- Kinetics and thermodynamics of isothermal seed germination, 51
- KING, C. E., GALLAHER, E. E. and LEVIN, D. A., Equilibrium diversity in plant-pollinator systems, 263
- KIRKWOOD, T. B. L. and HOLLIDAY, R., Commitment to senescence: a model for the finite and infinite growth of diploid and transformed human fibroblasts in culture, 481
- KLEIBER, M., Metabolic turnover rate: a physiological meaning of the metabolic rate per unit body weight, 199
- KUMBAR, M., Stable conformations of histamine by empirical method, 333
- LAKSHMANAN, M. and PONNUSWAMY, P. K., Nonlinear effects on the synaptic basis of memory (letter), 239
- LAPIDUS, I. R. and SCHILLER, R., Bacterial chemotaxis in a fixed attractant gradient, 215
- LEVIN, D. A. (see KING, C. E.), 263
- LEVINE, D. (see GROSSBERG, S.), 341
- Long range intermolecular forces between macroscopic bodies: macroscopic and microscopic approaches, 83
- LÓPEZ-SÁEZ, J. F., GONZÁLEZ-FERNÁNDEZ, A., DE LA TORRE, C., DíEZ, J. L., FERNÁNDEZ-GÓMEZ, M. E., NAVARRETE, M. H., GARCÍA-HERDUGO, G. and GIMÉNEZ-MARTÍN, G., A model for cell cycle and growth kinetics in roots, 463
- Magnolia seed carotenoid pigments: typical evolutionarily-static relicts? 277
- MANIOFF, J., Thermodynamic considerations of the deoxyribonucleic acid helix-cruciform transition (letter), 497
- Markov chains, application of, to analysis of a simulation of birds' foraging, 285
- Mate selection—a selection for a handicap, 205
- Membrane transport systems, active kinetic analysis of: equations for net velocity and isotope exchange, 125
- Memory, the synaptic basis of, nonlinear effects on (letter), 239
- Metabolic turnover rate: a physiological meaning of the metabolic rate per unit body weight, 199
- MILLER, C. J. (see HALL, G. G.), 475
- Mispair correction in nucleic acids with alternate forms, 395
- Mitotic autoregulation of normal and abnormal cells: alternative mechanisms for the derangement of growth control, 421
- Model for ageing, 253
- Model for cell cycle and growth kinetics in roots, 463
- Model of space filling in phyllotaxis, 435
- Model of the activation process of Na^+ conductance in the squid axon: an approach with interactive desorption kinetics of divalent cations, 309
- Molecular model, a possible, for RNA in narcissus mosaic virus: RNA conformation in rod-shaped viruses, 327
- Mosaic model for colour vision, 177

- Na⁺ conductance in the squid axon, model of the activation process of: an approach with interactive desorption kinetics of divalent cations, 309
- NAVARRETE, M. H. (see LÓPEZ-SÁEZ, J. F.), 463
- Neural networks, recurrent, the contrast enhancement and short term memory of, some developmental and attentional biases in, 341
- NIR, S., Long range intermolecular forces between macroscopic bodies: macroscopic and microscopic approaches, 83
- Nonlinear effects on the synaptic basis of memory (letter), 239
- NOVOTNÝ, J., Immunoglobulin phenotype as a solution of the antibody dilemma, 67
- Nucleic acids with alternate forms, mispair correction in, 395
- Orbital study, a molecular: coenzyme Q, 101
- Parameters affecting the rate of synthesis of ribosomes and RNA polymerase in bacteria, 115
- Phyllotaxis, model of space filling in, 435
- Plant-pollinator systems, equilibrium diversity in, 263
- PONNUSWAMY, P. K. (see LAKSHMANAN, M.) (letter), 239
- Quantitative aspects of the regulation of cellular cyclic AMP levels. I. Structure and kinetics of a model system, 1
- Quantitative aspects of regulation of cellular cyclic AMP levels. II. Kinetics of drug action in a model cyclic AMP generating system, 31
- RAHMAN, A. (see WILSON, H. R.), 327
- RANSOM, R., Computer analysis of division patterns in the *Drosophila* head disc, 445
- Ribonuclease, bovine pancreatic, a hypothesis for the pathway of the thermally-induced unfolding of, 403
- RICHARDS, W., Mosaic model for colour vision, 177
- RNA conformation in rod-shaped viruses: a possible molecular model for RNA in narcissus mosaic virus, 327
- SCHERAGA, H. A. (see BURGESS, A. W.), 403
- SCHILLER, R. (see LAPIDUS, I. R.), 215
- SCHNUELLE, G. W. (see HALL, G. G.), 475
- SEGEL, I. H. (see CUPPOLETTI, J.), 125
- Selection, mate—a selection for a handicap, 205
- Senescence, commitment to: a model for the finite and infinite growth of diploid and transformed human fibroblasts in culture, 481
- Sliding filaments in sperm flagella, 247
- Some developmental and attentional biases in the contrast enhancement and short term memory of recurrent neural networks, 341
- Stable conformations of histamine by empirical method, 333
- SUGITA, M., Functional analysis of chemical systems *in vivo* using a logical circuit equivalent. V. Molecular biological interpretation of the self-reproducing automata theory and chemico-physical interpretation of information in biological systems, 223
